

Arnold Schwarzenegger, Governor

STATE CLEARINGHOUSE

NEWSLETTER

September 16th-30st, 2004

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **September 16-30, 2004.**

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown.**

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Associate Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

Governor's Office of Planning and Research State Clearinghouse

Date: December 5, 2003

To: All CEQA Lead Agencies

From: Terry Roberts, Director, State Clearinghouse

Re: Submission of Electronic CEQA Documents to State Clearinghouse

In order to take advantage of the cost and time savings associated with electronic documents, the State Clearinghouse will accept electronic documents under the following conditions:

1. Electronic documents shall be on CD, and the file format shall be either Adobe PDF or Microsoft Word.
2. For EIRs, each CDs must be accompanied by a printed copy of the Executive Summary. This allows the State Clearinghouse and the reviewing agencies to efficiently route the document to the proper persons.
3. Negative Declarations and Mitigated Negative Declarations will not be accepted on CD. However, any separately bound technical appendices to the document may be submitted on CD.
4. For certain projects, particularly large infrastructure projects such as airport expansions, the State Clearinghouse may request a certain number of hard copies. In addition, the lead agency shall honor a special request from a responsible or trustee agency which requires a hardcopy for purposes of review and comment.
5. This policy does not invalidate CEQA Guideline §15205, which requires a public agency submitting printed documents to the State Clearinghouse to send, in addition, an electronic copy of the document, *if available*.

If you have any questions regarding the submission and circulation of environmental documents, please contact the State Clearinghouse at (916) 445-0613 or state.clearinghouse@opr.ca.gov.

**ENVIRONMENTAL DOCUMENT FILINGS

KEY:

NOP	Notice of Preparation
EIR	Draft Environmental Impact Report
ND/MND	Negative Declaration/Mitigated Negative Declaration
NOD	Notice of Determination
NOE	Notice of Exemption
EA	Environmental Assessment (federal)
EIS	Environmental Impact Statement (federal)
OTHER	Other types including Final EIRs, Early Consultation, etc.

NOTE:

There are more Total Documents than Total Projects because there are often multiple environmental documents filed for any individual project.

CEQA Documents

Key for abbreviations of Document Type:

CON	Early Consultation Notice
EIR	Draft Environmental Impact Report
SIR	Supplemental EIR
SBE	Subsequent EIR
EIS	Draft Environmental Impact Statement
EA	Draft Environmental Assessment
JD	Joint Document (CEQA/NEPA)
FONSI	Finding of No Significant Impact
Neg Dec	Negative Declaration/Mitigated Negative Declaration
NOE	Notice of Exemption
NOD	Notice of Determination
NOP	Notice of Preparation (of an EIR)
Oth	Other type (none of the above)

CEQA Actions

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<u>Documents Received on Thursday, September 16, 2004</u>			
2004091083	Riverlakes Ranch Community Park Development North Bakersfield Recreation and Park District Bakersfield--Kern Development of a 28+ acre community park in phases ultimately including: five sports fields with lights, a community center, aquatics complex, picnic provisions, children's play area, outdoor court games, open turf play, maintenance yard, grading, irrigation, landscaping, parking (530 spaces), walks, security lighting and associated improvements.	CON	10/14/2004
2004094003	City of Lindsay Long-Term Contract Renewal U.S. Bureau of Reclamation Lindsay--Tulare The Supplemental EA is for the long-term contract renewal of Central Valley Project water supplies to the City of Lindsay for 40 years. Reclamation completed a Final EA and FONSI in 2001 for the long-term contract renewal for 25 years. This Supplemental EA analyzes the impacts of continued water deliveries for an additional 15 years.	EA	10/15/2004
2004094004	City of Fresno Long-Term Contract Renewal Supplemental EA U.S. Bureau of Reclamation Fresno--Fresno The Supplemental EA is the long-term contract renewal of water supplies to the City of Fresno for 40 years. Reclamation prepared a Final EA and FONSI in 2001 for the long-term contract renewal for 25 years. The Supplemental EA examines the impacts of water deliveries for an additional 15 years.	EA	10/15/2004
2003081086	East Garrison Specific Plan Monterey County Planning & Building Inspection Marina--Monterey Specific Plan to accommodate up to 1470 housing units, 75,000 square feet of commercial space, 100,000 square feet for studio space for artist community / public uses.	EIR	11/01/2004
2003101027	Recycled Water Pipeline, Reservoir and Pump Station Otay Water District Chula Vista, San Diego--San Diego The proposed project will convey recycled water purchased from the City of San Diego's South Bay Water Reclamation Plant and distribute it to customers within the District via a 30-inch transmission pipeline, 450-1 Reservoir and 680-1 Pump Station. The proposed alignment connects to an existing 30-inch supply pipeline owned by the City of San Diego in Dairy Mart Road and continues northeasterly for approximately 6 miles in Dairy Mart Road, Beyer Boulevard, Del Sur Boulevard, Del Sol Boulevard, Main Street, Dennery Road, Brandywine Avenue, and Sequoia Street. In Sequoia Street, the pipeline connects to the reservoir's proposed inlet pipeline in West Point Drive, then follows a proposed access road northeasterly to the pump station and reservoir. The outlet pipeline from the proposed reservoir will travel northeasterly along existing dirt pathways where it terminates at an existing connection in Olympic Parkway. Trenchless construction will be utilized to minimize environmental impacts where the pipeline is proposed to cross under wetland habitat in the Otay River Valley from Dennery Road to Otay Valley Road near Auto Park Drive.	EIR	11/01/2004

<u>Documents Received on Thursday, September 16, 2004</u>			
2004051112	West Los Angeles College Facilities Master Plan Los Angeles Community College District Culver City--Los Angeles The West Los Angeles College Facilities Master Plan proposes the construction of new facilities, renovation of and additions to existing facilities, demolition of several existing buildings, development of a second access road to the campus, development of a new main entry to the campus, parking structures, landscaping, and open space. Implementation of the projects proposed under Master Plan would result in a net increase in building floor space on the campus of approximately 419,315 gross square feet (gsf).	EIR	11/01/2004
2003022121	Airport-San Juan Neighborhood Distribution Substation and Associated 4.8 Mile 69,000 Volt Sub-transmission Lines Sacramento Municipal Utility District Sacramento--Sacramento Install and operate two transformer 69kV/12kV neighborhood distribution substation and loop 69 kV interconnection to existing area substations and 69 kV lines. Steel or wood pole power line routing in public utility easements or right-of-way.	FIN	
2004091078	Bryant Industrial Area Plan Ojai, City of Ojai--Ventura The proposed area plan provides a description of the specific roadway extensions and intersection improvements that are contemplated by the Circulation Element and the policy context and framework behind those improvements. It also describes the existing and potential land uses within the study area and the long term effects, most notably, traffic generation, of the probable buildout of the area upon the circulation system. Based upon the evaluation of the trip generation at build-out and roadway and intersection capacity, the study evaluates the implications of build-out with regard to traffic and circulation impacts. The study also prescribes a preferred method of financing the proposed roadway and intersection improvements i.e., a trip mitigation fee program. Salient environmental issues would involve traffic and circulation, air quality and cultural resources. Probable environmental effects of the project would involve traffic and circulation. The planned improvements envisioned by the General Plan include the extension of Fulton Street southerly from its terminus at Pearl Street to Bryant Circle, as well as the extension of Pearl Street westerly from Bald Street to Fox Street. The Willow Street extension to Montgomery Street is also a planned project.	NOP	10/15/2004
2004091079	Memorial Area Middle School San Diego Unified School District San Diego--San Diego The project entails the acquisition of property by the District, demolition of existing structures, and the construction and operation of a new middle school within a developed portion of the City of San Diego. The proposed school would provide public education to 6th through 8th grade students residing in the surrounding community. Memorial Academy, a 6th through 9th grade facility, currently serves the student base in the area, but faces overcrowded conditions that will likely worsen in the coming years. The proposed middle school will accomodate approximately 1,500 students and associated teachers and administrators. Project development includes structures for classrooms, administrative offices, a cafeteria, and a gymnasium; and outdoor courtyard and recreational areas. Three alternative sites have been selected for the development of the school. Each of the three sites shall be equally analyzed at a project level in environmental review pursuant to the	NOP	10/15/2004

	California Environmental Quality Act.		
2004091086	Back Channel Navigation Safety Improvements Long Beach, Port of Long Beach--Los Angeles The proposed project consists of widening the Back Channel to 315 feet and deepening the widened areas of the channel up to -52 feet MLLW which will include the following: dredging and disposal of up to 300,000 cubic yards of marine sediments, removal and relocation of various underwater utility crossings, and the construction of subsurface cement-soil walls along the channel.	NOP	10/15/2004
2004092075	City of Escalon General Plan Update Escalon, City of Escalon--San Joaquin The proposed General Plan Planning Area is approximately 5,249 acres in size and contains a mixture of residential, agricultural, commercial, and industrial land uses. The agency is establishing a 50-year growth boundary to guide future growth of the City in its Planning Area.	NOP	10/15/2004
2004091075	Hundertmark Grading Permit PMT 2003-00517, 2003-00518 San Luis Obispo County Paso Robles--San Luis Obispo Proposal by Mark Hundertmark for grading permits to allow for grading and construction of: 1) Improvements for a new access road and two driveways; 2) Two building pads for the construction of two 1,533 SF residences with 535 SF attached garages; 3) Drainage improvements; 4) Construction of two wastewater treatment systems including septic tanks and leach fields; 5) Two on-site well pads; and 6) Landscaping and related site improvements. The projects will collectively result in approximately 18,400 SF of site disturbance and will require 488 cubic yards of cut and 474 cubic yards of fill. The project sites are located on the north and south side of Baron Place directly across from each other, approximately 500 feet east of Debonair Drive, approximately 9 miles east of the City of Paso Robles, in the El Pomar - Estrella planning area.	Neg	10/15/2004
2004091076	Vineyard Corridor Improvement San Luis Obispo County --San Luis Obispo The County of San Luis Obispo proposes to widen the Vineyard Drive overpass at Hwy 101 to add center left turn lanes and traffic signals at the interchange. The improved Vineyard Drive will include three 3.6 m (12') lanes (two through traffic lanes and one two-way, left turn lane), two 1.8 m (6') shoulders, which will serve as Class II Bikeways (Bike Lanes), and a 1.8 m (6') wide AC pedestrian path on the north side of the roadway. The Vineyard Drive Overcrossing will also be widened to accommodate 3.6 m (12') lanes, one 1.8 m (6') shoulder / bike lane on the south side of the structure, one 1.5 m (5') shoulder / bike lane on the north side of the structure and a 2.1 m (7') sidewalk on the north side of the structure. In addition to the widening of Vineyard Drive, the U.S. 101 southbound off ramp and U.S. 101 northbound off ramp will be widened and signalized at their intersections with Vineyard Drive. The area of disturbance will total approximately 5 acres. The entire impacted area will be seeded and mulched, planted and erosion control measures will be installed to prevent erosion. 2004091077	<p>Alternative Onsite Wastewater Treatment Systems, MISC 04-016 San Diego County --San Diego</p> <p>The project is proposing to permit the construction and use of a limited number of alternative on-site wastewater treatment systems. Permits would be restricted to single-family dwellings on existing legal lots. The systems would be required to meet certain operational standards and to comply with the terms of an operating permit. The project will allow the Department of Environmental Health to issue permits for the installation of up to 100 alternative systems over a period of three years, or until the regulations mandated by section 13291 of the State Water Code are in place.</p>	Neg	10/15/2004
2004091080	<p>Compton Redevelopment Project, Amendment No. 1 Compton, City of Compton--Los Angeles</p> <p>The project involves the adoption of Amendment No. 1 to the existing Redevelopment Plan for the Compton Redevelopment Project. This action will re-establish the Compton Redevelopment Agency's authority to commence eminent domain proceedings on properties within the Project Area for a 12-year term. Amendment No. 1 will not alter the boundaries of the Project Area. Although no development or construction is proposed at this time, the continued implementation of the Redevelopment Plan is expected to facilitate commercial, industrial / manufacturing public, and residential development in the Project Area in conformance with the Compton General Plan, to address various environmental issues, and to mitigate existing public infrastructure system deficiencies. The primary purpose of the Redevelopment Plan continues to be the elimination of physical and economic blighting conditions that hinder the full development of the Project Area.</p>	Neg	10/15/2004
2004091081	<p>Elementary School No. 30 Fontana Unified School District Fontana--San Bernardino</p> <p>The project entails replacement of the 500-student Citrus Continuation High School with Elementary School #30, a 750-student elementary school, and modernization of the District bus yard and maintenance and operations department.</p>	Neg	10/15/2004
2004091084	<p>AD 02-059 / Log No. 02-05-002 / Wright Agricultural Clearing Permit San Diego County Department of Planning and Land Use --San Diego</p> <p>The project site received a Clearing Violation Notice on October 11, 2002 from the Department of Planning and Land Use Codes Enforcement Division. The project is to legitimize the clearing of 46.73 acres of Stabilized and Partially Stabilized Desert Sand Field / Desert Saltbush Scrub on the 159.4-acre site. Of the 46.73 acres of clearing, 33.70 acres were planted with California, Mexican, and hybrid fan palms in May of 2002. Mitigation will be required for impacts to the Stabilized and Partially Stabilized Desert Sand Field / Desert Saltbush Scrub. The project proposes the use of groundwater. Borrego Valley is in a groundwater overdraft condition noted by declining groundwater levels. Additional groundwater extraction will likely contribute to groundwater level decline within the Borrego Valley. Therefore, the project will mitigate groundwater use of 50 acre-feet per year at a 1:1 mitigation ratio. A temporary concrete plant is located on the northeast corner of the property. The concrete plant is not a part of this permit. The temporary concrete plant is allowed per Zoning Ordinance Section 6110.</p>	Neg	10/15/2004

	projected growth as outlined in the master plan. The project, now referred to by the campus as EDES (Environmental Design) South, consists of four structures, one one-story building, and three three-story buildings, connected by exterior walkways. The buildings will have a drilled pier slab on grade foundations, with a steel brace frame structure. The exterior of the buildings will include glass curtain walls, ribbed metal and pre-cast panels. This project contains many sustainable features including operable windows and single loaded corridors that will allow for cross ventilation of the laboratory and lecture spaces. The building also includes appropriate shading devices and the landscaping includes the use of drought tolerant plantings. Nonstate funds will provide for three demonstration labs, a conference room and support space.		
2001101167	Plaza de Cultura y Arte Los Angeles County Los Angeles, City of--Los Angeles The Plaza de Cultura y Arte will create a pedestrian-oriented facility that celebrates, promotes, and preserves an understanding and appreciation of the Mexican American historical contributions to Los Angeles through a full range of integrated cultural, educational, and arts programming. The project will be developed as a multipurpose facility for out-of-state and regional visitors, as well as local residents with a capacity to serve approximately 134,000 visitors annually. The project will consist of paseos and pedestrian walkways, an outdoor classroom, the Campo Santo Memorial Garden, new and adaptively reused structures for a total interior square footage of 106,500 square feet, and a turnaround at New High Street. Interior space to support programming would include the adaptive reuse of 14,100 square feet within the rehabilitated Plaza House; adaptive reuse of approximately 28,200 square feet within the rehabilitated Vickrey-Brunswick Building with exhibition galleries, classroom space for the visual arts and music, offices, and storage; 39,200 square feet of new construction for community events and a variety of public-oriented uses; and 25,000 square feet of new construction for a Theater Performing Arts Center to include a 500-seat theater. The project requires the demolition of the historic Brunswick Annex.	NOD	
2003111036	Conditional Use Permit Case No. 620 Santa Fe Springs, City of --Los Angeles The proposed project involves a request for a conditional use permit approval to allow a centralized wastewater treatment facility utilizing the existing wastewater system, augmented with additional portable, treatment equipment, to process non-hazardous wastewater from outside sources on a 1.5 acre portion of the 45-acre site.	NOD	
2004031050	Jana Lane Open Space Vacation San Diego County Department of Planning and Land Use --San Diego The project proposes the vacation of a biological open space easement. The easement will be replaced by another easement to be placed over the project site that will preserve the majority of Englemann oaks with an easement that prohibits all activities.	NOD

2004099043	Neary Lagoon Santa Cruz, City of Santa Cruz--Santa Cruz The Operator proposes to repeat removal of tules and bulrush from Neary Lagoon in the City of Santa Cruz. The intent of the operation is to preserve open water areas. Equipment used to carry out the project will include an "Aquamog" with a clambucket, tulerake or rotovator attachment; and a harvester to collect uprooted or otherwise removed material. Vegetation is either pulled out directly by the clambucket, turned up by the tulerake or chopped out with the rotovator.	NOD	
2004099044	2002-Sycamore Canyon Trail Fish & Game #5 San Dimas--Los Angeles Proposes to the streambed by creating an equestrian trail within Sycamore Canyon and adjacent to Sycamore Flats Motorway for access to the open space in the Angeles National Forest. The proposed trail is 2,600 feet in length and 8 wide. The trail will cross Sycamore Canyon Creek in eight locations. The crossings will be constructed using an earthen or rock base that will utilize rock waterbars, rolling dips, retaining walls, gabion basket retaining walls, and rock dams to maintain the trail and prevent erosion. SAA #R5-2002-0237 rev 2	NOD	
2004098217	Extended and International Education Building, Phase II California State University, Dominguez Hills Carson--Los Angeles This project will build a two-story, 19,700 ASF/ 30,300 GSF facility; and will include eight 32-station classrooms, two 48-station classrooms, one 98-station classroom, office and support space for Administration, International Education and Marketing, and restrooms. The purpose is to provide additionally needed classrooms and office space that is located closer to the campus core. Beneficiaries are the students and the expanded Extended Education program and International Education program. This project is non-state funded.	NOE	
2004098218	California Academy of Math and Science, Phase II California State University, Dominguez Hills Carson--Los Angeles This project will build a two-story, 25,983 ASF/ 32,479 GSF facility; and it will include 14 new classrooms/ Labs, Food Service Facilities, and a Multipurpose Building (Gym, State, and Locker Rooms) on property leased by the California Academy of Math and Science. The purpose is to provide additionally needed classrooms and other identified facilities space that is located closer to the CAMS area. Beneficiaries are the CAMS students and the expanded California Academy of Math and Science program. The University will also benefit by the vacated space the CAMS program is currently leasing. This project is non-state funded.	NOE	
2004098220	Post Installation Parks and Recreation, Department of --Sonoma Place an additional 10"x10"x36" high post on the existing bike path at the Vallejo Home area of Sonoma State Historic Park to prevent vehicles from driving on the bike path. Installation will require digging an 18"x24" deep hole. The District Archaeologist to be notified prior to digging. If archeological materials are uncovered in the excavation for the post, all work to be halted until consultation with Archeologist.	NOE

2004098221	Cultural Resources Trenching Survey (04/05-SD-10) Parks and Recreation, Department of --San Diego This project consists of an archaeological trenching survey in Border Field State Park. This project will include a minimum of 56 backhoe trenches excavated on a 100 meter grid to help identify the presence or absence of potential buried sites in an area of approximately 560 acres, excluding those areas removed from consideration because they contain sensitive biological resources. The study areas covered within the survey trenching plan include the southern arm of the Tijuana Estuary and adjacent land.	NOE	
2004098222	People Counter Installation: South Carlsbad SB and San Elijo SP (04/05-SD-07) Parks and Recreation, Department of --San Diego This project consists of the installation of two people counters (devices that give valuable and accurate beach attendance data)-wooden boxes 16"x20" with reflective device (2"x4") on opposing side of pathways inline with boxes that hold laser. One counter will be placed on day-use walkway in north San Elijo State Park and one will be located in South Carlsbad State Beach parking lot.	NOE	
2004098223	Replace Front Decking-Seeley Stables (04/05-SD-06) Parks and Recreation, Department of --San Diego This project consists of the replacement of a wood decking located at the entrance of Seeley Stables a reconstructed replica of the original building, and now a history museum in Old Town San Diego Historic Park. The replacement deck will have underlying stringers replaced with Trex 2x4 plastic lumber and 2x8 treated DF boards over stringers. Trex material will not be seen. No digging will be done as original deck is set on concrete.	NOE	
2004098224	Sorrento Valley Road Knoll-Land (04/05-SD-11) Parks and Recreation, Department of --San Diego This project consists of the acquisition of approximately of 2.3 acres of the Sorrento Valley Road property which is contiguous with the 1,700 acre Torrey Pines State Reserve to the west and abuts Interstate-5 to the east. As a portion of the property is located under elevated portions of Interstate-5, the property also connects to contiguous open space habitat owned and managed by the City of San Diego eastwardly up Los Penasquitos Canyon. Wildlife use this connection to move between the State Reserve, Lagoon and adjacent open space to the east. The acquisition of Sorrento Valley Road Knoll also lays the foundation to connect the proposed Sorrento Valley Road Trail to the existing trail system within the State Reserve and on City of San Diego lands. The addition of the subject property into public ownership for preservation and recreation provides a direct trail connection and includes two planned bridges, one for pedestrians and bicyclists. The footbridge will be compliant with the Americans with Disabilities Act (ADA).	NOE	
2004098225	Southern Plant Facility for Southern California Water Company, Southwest System Health Services, Department of Gardena--Los Angeles Provide manganese and iron removal treatment for Southern Well #5, modify the existing piping, install a storage tank for the backwash water and replace the existing chemical buildings for Southern Well #6. 2004098228	Putah Creek Bridge Abutment Work Fish & Game #3 --Lake The proposed project involves emergency repair work to the southern abutment of the Putah Creek Bridge on Hwy 29 (PM 9.74) approximately 4 miles north of Middletown, Lake County. Seasonal high flows in the 2003/2004 storm season have eroded the bank adjacent to the southern abutment and could potentially undermine the southern abutment if allowed to continue. Caltrans is proposing to reinforce the bridge abutment by armoring approximately 890 meters (262 feet) of the southern bank of Putah Creek upstream of the existing bridge. In addition, Caltrans is proposing to construct three spur dikes approximately 7 meters (7 feet) in length to redirect flow away from the southern abutment during high flow events. The Department of Fish and Game is issuing a Streambed Alteration Agreement Number 1600-2004-0669-3 pursuant to Fish and Game Code Section 1602.	NOE	
2004098229	Gamble Riparian Restoration Fish & Game #3 Yountville--Napa The operator proposes to restore the banks along 600 feet of Conn Creek from the intersection of Rector Creek downstream located at 1851 Cook Road in Yountville, Napa County. To accomplish the restoration, the project includes laying back approximately 350 linear feet of bank, removal of non-native Pierce's disease host plants and replacement with native riparian plants, management of flood debris buildup, seeding with native grass cover for a riparian buffer, and installation of a grassed waterway in the vineyard. Issuance of a Streambed Alteration Agreement Number 1600-2004-0604-3 is pursuant of Fish and Game Code Section 1602.	NOE	
2004098230	Highway 1 Storm Drain Repair Fish & Game #3 --Marin Remove and replace approximately 162 cubic meters of sacked-concrete and regrade the embankment at three eroded sites along an unnamed tributary (sometimes called Cemetery Creek) to Olema Creek that runs parallel to and west of Highway 1. Issuance of a Streambed Alteration Agreement Number 1600-2004-0546-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2004098231	Vineyard Creek Fish & Game #3 Santa Rosa--Sonoma Construction of a 36-inch diameter stormdrain outfall pipe on Mark West Creek. The outfall and the rock energy dissipation system will be located on a gravel bench above ordinary high water. Issuance of a Streambed Alteration Agreement	NOE

2004091104	<p>Injection of Gaseous Ozone at 76 Station 0971 Regional Water Quality Control Board, Region 4 (Los Angeles) Beverly Hills--Los Angeles</p> <p>Under the oversight of the Regional Board, ConocoPhillips proposes to install and operate a C-Sparge system to remediate the dissolved-phase petroleum hydro-carbon plume beneath the site. The C-Sparge technology combines low-flow (3 to 5 cubic feet per minute [cfm] air sparging with ozonization to oxidize petroleum hydrocarbons into benign byproducts, carbon dioxide and water. Ozone is generated onsite using a control panel with built-in compressor and ozone generator. Using perforated sparge points, microbubbles (10 to 50 um) of encapsulated ozone are introduced below the water table, where the oxidation reactions take place.</p> <p>Seven sparge points, integral to the C-Sparge system, will be used onsite within the dissolved-phase plume. Using a control panel with a built-in compressor and ozone generator, microbubbles of encapsulated ozone will be introduced into the subsurface through a given sparge point or points at flow rates ranging from 3 to 5 cubic feet per minute (cfm). During sparging, no groundwater or vapors will be extracted. Sparging will be performed on a cycled basis with each well cycled on for 5 to 10 minutes.</p> <p>During C-Sparge system operations, microbubbles of encapsulated ozone will be discharged into the subsurface beneath the site. No other known constituents will be discharged to the subsurface during system operations. The C-Sparge system will inject approximately five grams per hour of ozone at the flow rate of 3 to 5 cfm. Therefore, the total concentration of ozone injected into the subsurface during system operations will be approximately 0.59 miligram per liter.</p>	NOP	10/18/2004
2004092077	<p>Gentry Property Annexation Suisun, City of Suisun City--Solano</p> <p>The proposed project involves the annexation of approximately 167.6 acres into the City of Suisun City. In addition, the project involves the re-desingation of the western portion of the site from Limited Industrial/Business Park and General Commercial to Planned Unit Development (PUD) General Commercial to accomodate future retail development. The project also involves the re-designation of the eastern portion of the project site from Limited Industrial/Business Park and General Commercial to Agriculture-Open Space to accomodate open space uses as well as 4 acres to be re-designated Residential High Density. The southwestern portion of the project site would also be re-designated from Limited Industrial/Business Park to Residential High Density. Furthermore, the northeastern corner of the site, which is currently located within the Suisun city limits, is also proposed to be retained as open space and therefore would need to be re-designated from Residential Low Density to Agriculture-Open Space. The project also involves prezoning of a total of 159.6 acres as follows: 69.5 acres of General Commercial (CG) with PUD Overlay; 15.7 acres of High Density Residential (R-H) with PUD Overlay; and 74.4 acres of Agriculture (AG).</p>	NOP	10/18/2004

2003122119	333 Oyster Point Boulevard Office / R&D Project South San Francisco, City of South San Francisco--San Mateo 315,444 square feet of mixed office/R&D in three buildings, three to four stories in height Parking for 882 spaces, of which 679 spaces would be in a six-level garage.	EIR	11/03/2004
2002082043	Martin Slough Interceptor Project Eureka, City of Eureka--Humboldt The Martin Slough Interceptor Project is proposed in order to increase the reliability of the City's existing wastewater collection system for avoiding wastewater overflows in the project area, as well as increasing the cost-effectiveness of the system's operations. The proposed project generally includes elements in three major segments: (1) a collection system for wastewater from a new "interceptor" pipeline, all operating primarily under the influence of gravity; (2) a new pump station, located at Pine Hill Road and Myers Avenue; and (3) a new pressure sewer line (or "force main") that will connect the new pump station to the existing wastewater treatment facility. The new collection system and force main elements will essentially all be located below the ground surface. The pump station will be a relatively small structure, on a built-up site approximately 50 feet by 60 feet, which will include landscaping and parking areas for maintenance vehicles. See DEIR for complete Project Description.	FIN	
2003072005	Peninsula Medical Center Replacement Project Burlingame, City of Burlingame--San Mateo The project is the proposed replacement and expansion of the existing Peninsula Medical Center and nearby medical office buildings, together with related parcel mergers and changes in zoning designations for the project site. 	Beginning at the southern end, the proposed project would provide: -A four-lane, fully access-controlled freeway on a new alignment between 0.18 miles north of the Boronda Road interchange and the intersection of Martines Road. -Undercrossing structures along a new elevated freeway segment over Russell and Espinosa Roads, connecting the two local roads and allowing through movements from the east and west sides of Route 101. No freeway access to Route 101 would be provided at this location. -A new local road interchange approximately 0.62 miles north of Russell/Espinosa Road. -A new local road connecting White Road to Martines Road. -A cul-de-sac at the intersection of Martines Road and Route 101. -A new local road extending south from the intersection of Blackie and Prunedale South Roads. The new road would cross over Route 101 approximately 280 meters (919 feet) south of the existing Blackie/Reese and Route 101 intersection and connect to Reese Circle, 85 meters (279 feet) east of Cross Road.		
2004092093	Deer Creek Plaza Petaluma, City of Petaluma--Sonoma The project includes 325,363 square feet of commercial uses, a 1,457-space parking lot, a 1.84-acre park, a 3.55-acre wetland area and 0.81-acre right-of-way for the future Rainier Avenue interchange and extension. A General Plan Amendment and a Rezone to a PUD are required. The project includes up to three major stores, five retail/restaurant buildings, and five buildings for a bank and drive-thru restaurants. 2001042047	Transfer Station/Materials Recovery Facility of Del Norte County Del Norte Solid Waste Management Authority Crescent City--Del Norte Development and operation of a new Large Volume Transfer/Processing Facility on 13.3 acres of which 4.74 acres are for waste handling. The facility will operate Monday-Friday from 8:00 am to 5:00 pm and Saturday-Sunday from 9:00 am to 5:00 pm with Ancillary Operations occurring Monday-Friday 7:00 am to 7:00 pm and Saturday-Sunday 8:00 am to 6:00 pm. The facility will accept a maximum of 300 tons per day with a corresponding vehicle count of 848 vehicles per day.	NOD	
2003041128	East-West Channel Regrading ER-0214 Lompoc, City of Lompoc--Santa Barbara SAA # 1600-2003-5144-R5 Stabilize the banks of the East West Channel and construct an access road within the channel.	NOD	
2003051090	B.A.P.S. Temple and Cultural Center - Development Code Amendment 03DCA01: 02GPA04; 02ZC03; TPM 15901; 02CUP09; 02SPR07 Chino Hills, City of Chino, Brea--San Bernardino The project is a B.A.P.S. Temple and Cultural Center, a Hindu socio-religious facility. The project could contain up to 164,372 square feet of building area on a 20.31-acre site. It would consist of the Temple and Cultural Center buildings, with ancillary parking, plazas and landscaping. The applicant would construct Fairfield Ranch Road as part of the proposed Temple and Cultural Center project. The road would serve the project as well as future business park development that may occur on the adjacent properties. Development of the project consists of a Tentative Parcel Map to reconfigure the existing parcels to accomodate the realignment of Fairfield Ranch Road; an Amendment to the Special Use Standards for Churches (Religious Facilities), Section 16.42.010 of the Development Code to permit the height of towers, steeples, or other similar architectural features on religious facilities to exceed the height limits of all zones in the City, up to a maximum of 80 feet; a Conditional Use Permit to permit construction of a religious facility pursuant to Special Use Standards, Section 16.42.020 of the Development Code and to permit a religious facility to locate in the RM-3 zone; a Site Plan Review for the proposed design of the B.A.P.S. Temple site; determination of the cancellation fee for the land conservation contract pursuant to the Williamson Act; and cancellation of the Temple/Cultural Center and Fairfield Ranch Road sites from the agricultural preserve pursuant to the Williamson Act. 	the hours of use of the park because it does not include any lighting of fields, playgrounds, and courts. New nighttime safety lighting will be provided around the perimeter of the park, and safety lighting will also be installed on the meeting house.		
2004091135	Bartlett Point and Ash Point Air Quality Monitoring Stations (Proposed Project) Great Basin Air Pollution Control District --Inyo The goal and objective of the proposed project is to increase the ability of the GBUAPCD to monitor ambient air quality on the west side of Owens Lake when weather conditions create winds from an easterly or southerly direction. To accomplish this goal, the proposed air quality monitoring stations are to be placed at prominent locations overlooking the west shore of Owens Lake. Each station would consist of prefabricated enclosures with a tower approximately 33 feet high. The height of the structures themselves would be approximately 8 feet with a tower approximately 33 feet high.	Neg	10/22/2004
2004092098	Gaylord Container Company, Black Liquor Pond Remedial Action at the East Mill Site Toxic Substances Control, Department of, Northern California Permitting Branch Antioch--Contra Costa The Department of Toxic Substances Control is considering approval of an Interim Remedial Action Plan pursuant to authority granted under Chapter 6.8, Division 20, California Health and Safety Code. The objective of the interim remedial action is to remove materials associated with kraft pulping and bleaching processes within the black liquor pond. Gaylord Container Corporation is proposing to remove an unlined pond at their East Mill Site located at 2603 Wilbur Avenue in Antioch, California. The black liquor pond, an area roughly 125 by 450 feet, with a maximum depth of 21 feet below ground surface, is located on the southeast corner of the Site. The Site is bordered to the north by the San Joaquin River, to the south by Wilbur Avenue, to the east by Delta Mirant, and to the west by Gaylord's West Mill. The black liquor pond was used intermittently to store black liquor; a byproduct of the mill operation from the early 1950s until the 1970s after which it was backfilled with soil and wood chips. Soil investigations show elevated concentration of lead, nickel, and dioxins/furans in the black liquor pond.	Neg	10/22/2004
2004092100	Eastside Middle School Patterson Joint Unified School District Patterson--Stanislaus The Patterson Joint Unified School District ("District") proposes to undertake the acquisition of 19 acres of land for the construction and operation of the proposed Eastside Middle School ("Project"). Facilities to be constructed include classrooms for approximately 800 to 1,000 students for development of a middle school which will be utilized in the interim for grades kindergarten through eighth (K-8); administrative offices, library, multi-purpose rooms, cafeteria parking (for teachers, staff and visitors) for loading/drop-off, fire lanes, playgrounds including hardscape and turf playfields and landscaping. The buildings will be designed to comply with State Department of Education's guidelines and local zoning codes. The lighting for the Project will include low level security lighting, signage, and illumination of the surface parking lot and associated pedestrian areas. The Eastside Middle School will serve the needs of the District and the surrounding	Neg	10/21/2004

	community. The purpose of the Project is to provide educational facilities for elementary or middle school students within the District. Educational programs will be offered during the day, but occasional evening community programs are anticipated.		
2004092102	Colfax Auto Plaza Colfax, City of Colfax--Placer The proposed project is the construction of three separate but related buildings on one parcel; a 2,878 classic car showroom on the upper level and approximately 2,800 SF service area on the lower level; a 1,482 SF lube/oil change facility; and a 1,749 SF carwash facility.	Neg	10/21/2004
1989010086	IRVINE DESATLTING FACILITY Orange County Water District The IDP is a joint groundwater quality restoration project by the OCWD and IRWD to clean up the groundwater in the vicinity of the former Marine Corps Air Station (MCAS) El Toro base. The natural geology and past agricultural drainage have resulted in undesirable levels of total dissolved solids (TDS)-or salts-and nitrated in the local groundwaters. Separately, past chemical disposal and waste handling practices at the former MCAS have caused seepage of volatile organic compounds (VOCs) such as trichloroethylene (TCE) into both the shallow and principal aquifers on and adjacent to the former MCAS.	NOD	
1999082041	Modesto Urban Area General Plan Amendment-Housing Element Update Modesto, City of Modesto--Stanislaus Amendment to the south portion of P-D(346) to allow addition of a 14,811-square foot office building, a second-story addition to a storage building and additional off-street parking.	NOD	
2000011068	Paso Robles Vineyard Agricultural Cluster Subdivision Project San Luis Obispo County Paso Robles--San Luis Obispo An unnamed drainage flows through the agricultural valleys east of Paso Robles before tributarying to Huerhuero Creek (Township26S, Range12E, Section 25, APN 026-211-033). The proposed project would install a 36-inch corrugated metal pipe in the drainage to allow flow to pass under a road. Approximately 192 cubic yards of cut and fill would be needed to accomodate the culvert and the road crossing. Approximately 12 cubic yards of rock slope protection would be installed at the culvert inflow and outflow to dissipate the water's energy and reduce erosion. While several other culverts would be installed within the adjacent area, the other culverts would be installed in areas that are noth within the Department's jurisdiction and therefore are not subject to this agreement. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2004-0627-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, Mr. Phil Christensen/Paso Robles Vineyards.	NOD

2001041008	Thompson/Tabata-ZC 98-08/LCPA 98-04/CT 98-14/PUD 98-05/CP 00-02/SDP 99-06/HDP 98-15/CDP 98-68 Carlsbad, City of Carlsbad--San Diego General Plan Amendment and Local Coastal Program Amendment to adjust the boundary between the Residential Low Medium Density (RLM) and Residential Medium Density (RM) General Plan land use designations over approximately 7.9 acres within the Thompson/Tabata residential subdivision.	NOD	
2002071007	Telegraph Canyon Road Widening Chula Vista, City of Chula Vista--San Diego The project consists of the approval of the widening of the north side of Telegraph Canyon Road from the Interstate 805 northbound on-ramp to approximately 1,000 feet east of Halecrest Drive in order to provide an additional westbound lane. The project requires the acquisition of a portion of APN 639-080-22 (ARCO gas station property situated immediately west of Halecrest Drive); therefore, the project actions also include determining and declaring the public interest and necessity for acquiring this additional street right-of-way and authorizing condemnation and immediate possession of this property. Environmental impacts associated with the construction of the project were addressed in Final Mitigated Negative Declaration IS-02-35, adopted by the City Council on September 17, 2002; minor project design modifications have been made subsequent to its adoption.	NOD	
2003111009	Cross Connection Prevention Program Metropolitan Water District of Southern California --Los Angeles, Riverside, Orange, San Diego Metropolitan is required by the State of California Code of Regulations to protect its treated water supply systems from potential contamination through the implementation of a cross connection prevention program. A cross connection is an unprotected connection between a potable water line and any source containing unapproved water or substances that are not classified as safe, wholesome, and potable. Existing potential contamination sites include locations where the drinking water supply feeder lines that may be subject to infiltration by contaminants include: air release valves, air vacuum valves, blow-off structures, and air stacks. Through the Cross Connection Prevention Program, Metropolitan will modify/relocate to these types of equipment in order to prevent potential contamination of drinking water supplies.	NOD	
2004031002	Chula Vista Crossings Commercial Retail Project Chula Vista, City of --San Diego The proposed project consists of redevelopment of 17.2 acres of a 24.1-acre property with an existing outdoor storage facility to a commercial retail use. The remainder 6.8-acre portion lies within the Otay River Valley area and MSCP preserve and will not be developed. The project proposes the construction of seven buildings with an approximate total leaseable building area of 188,038 square feet. The project proposes to include two freestanding restaurants, a main department store anchor and additional retail spaces. The project would also include a freestanding sign directed to I-805 motorists as well as additional sign features including signage along Main Street. The discretionary actions approved by the City consisted of approval of a General Plan Amendment, Zone Change, Tentative Parcel Map, Design Review Committee approval and an Owner Participation Agreement. 1984061912	<p>Rincon Hill Mixed Use District (2000.1081E) San Francisco, City and County of San Francisco--SAN FRANCISCO</p> <p>The San Francisco Planning Department proposes to amend the Area Plan for the Rincon Hill Area and to combine the Planning Code's Rincon Hill Special Use District sub-area designations (Residential and Commercial/Industrial sub-areas) into one Rincon Hill Mixed Use (RHM) District, to increase height limits, and to make other changes intended to stimulate additional high density, residential development in the Rincon Hill area. The proposal would also rezone five parcels north of Folsom Street, between Main and Spear Streets, and would enact a 15-foot legislated setback (beyond the existing 10-foot sidewalk) on the north side of Folsom Street in order to ensure that future development in the area does not preclude development of a widened sidewalk and "boulevard" treatment for this section of Folsom Street. Amendments of the San Francisco General Plan and Planning Code, including text and zoning map changes, would be required for the proposal.</p>	EIR	11/08/2004
1991073040	<p>Yolo County Central Landfill Permit Revisions Yolo County --Yolo</p> <p>Draft EIR for the Yolo County Central Landfill (YCCL) proposed design and operation changes. The proposed changes to the design and operation of the YCCL included in the project are 1) expanding bioreactor operations, 2) landfill height increase, 3) landfill mining, 4) adding a material recovery facility, 5) expanding the composting facility, 6) expanding salvaging, 7) adding a permanent household hazardous waste collection facility, 8) purchasing land for a soil borrow area, and 9) expanding landfill gas use options.</p>	EIR	11/08/2004
2004011078	<p>Annual Amendments to the Comprehensive Land Use Plans for San Diego County Airports San Diego County San Diego, Fallbrook, Carlsbad, Oceanside--San Diego</p> <p>The Annual Amendments to the Comprehensive Land Use Plans ("CLUP") for San Diego County Airports consist of amendments to the State-required Comprehensive Land Use Plans for San Diego International Airport, Montgomery Field, Brown Field, Gillespie Field, Borrego Valley Airport, McClellan-Palomar Airport, Fallbrook Community Airpark, Marine Corps Air Station Miramar, and Oceanside Municipal Airport. The Comprehensive Land Use Plans provide for orderly growth of airports and the safeguarding of the general welfare inhabitants in the vicinity of airports, and the proposed CLUP Amendments Project is intended to further these goals.</p>	FIN

2004082004	E Street Sewer and Storm Drain Project Lincoln, City of Lincoln--Placer Approximately 8,000 feet of sewer pipeline and 4,000 feet of storm drain pipeline would be installed to relieve surcharged systems in the City of Lincoln. Half of the construction would occur in City streets, primarily E Street, with additional construction in undeveloped lots. The proposed project is not intended to increase wastewater or storm water flow. The new utilities would serve existing or planned development approved in the City's General Plan.	FIN	
2004091136	Sprint Avenida Magnifica San Diego, City of San Diego--San Diego Sprint Avenida Magnifica: Neighborhood Use Permit (NUP) to construct, operate and maintain an unnamed, wireless communication facility. The project would consist of three antennas and one GPS antenna mounted on a 30 foot-high light standard which would replace an existing 23 foot-high light standard, associated equipment located in a subterranean vault, two vent pipes, and one strong box cabinet. The project is proposed to be located completely within the public right-of-way on the west side of Avenida Magnifica, south of Pomerado Road (a stip of land 9.5 wide lying within the Avenida Magnifica right-of-way as shown on Scripps Ranch Estates Map No. 9587 in the City of San Diego, County of San Diego, State of California) within the RS-11 zone of the Scripps Miramar Ranch Community Plan. Applicant: Lisa Murphy.	Neg	10/25/2004
2004091138	Uptown (also referred to as Grant Hill) Substation Project Public Utilities Commission San Diego--San Diego SDG&E is proposing to construct a new 120 MVA distribution substation in the vicinity of State Route 94 (SR-94) and 30th Street in the community of Grant Hill within the Southeast San Diego Community Plan area of the City of San Diego, California. The proposed substation would be situated on a 2.6 acre parcel and configured as a 120 megavolt ampere (MVA), 138/12 Kilovolt (kV), low profile design consisting of four low profile, low sound 30 MVA transformers, four sections of switchgear to accommodate sixteen 12 kV circuits, and four 12 kV metal enclosed capacitors. The design of the distribution equipment is a low profile design with a maximum equipment height of approximately 14 feet. The transmission component of the substation would include four underground 138 kV transmission lines, four 138 kV switch stand structures, a low profile 138 kV bus, and nine 138 kV circuit breakers. The transmission equipment would be a low profile design with a maximum equipment height of approximately 14 feet. A 12-foot high screening wall would enclose the substation area (approximately 280 feet by 285 feet) and a 25-foot setback for landscaping would be provided along 30th Street.	Neg	10/25/2004
2004091139	New Transportation Facility Mendota Unified School District Mendota--Fresno Construct and operate transportation facility designed to accommodate parking, light maintenance, and washing of school buses.	Neg	10/25/2004

2004091140	Silvola Tentative Parcel Map San Diego County Department of Planning and Land Use Fallbrook--San Diego Subdivide a 26.85-acre parcel into three parcels of 4.37, 9.72, and 12.76 acres gross.	Neg	10/25/2004
2004091141	Planning Area 6 Zones 4 and C Reservoirs and Booster Pump Stations Project Irvine Ranch Water District Irvine--Orange The proposed Reservoirs and Booster Pump Stations project would consist of two reservoirs and two booster pump stations. The two reservoirs would be partially buried pre-stressed concrete tanks. Both reservoirs will have a nominal height of 30 feet. The 3.5 MG domestic water tank would be 145 feet in diameter. The 2.2 MD recycled water tank would have a diameter of 118 feet. The two booster pump stations would consist of up to four 125-horsepower fixed-speed duty pumps. Both pump stations would be housed under a single, 20-foot wide canopy. A five foot-high berm would provide visual and noise screening.	Neg	10/25/2004
2004092109	Application to Appropriate Water No. 31074 State Water Resources Control Board, Division of Water Rights Rocklin--Placer The Applicant proposes to divert a total of 49 acre-feet per annum of water, from a Point of Diversion on an unnamed stream tributary to Miners Ravine thence Dry Creek thence Natomas Main Drainage Canal thence Sacramento River in Placer County. From December 31 to March 31 the water would be diverted to storage into an existing offstream reservoir at the diversion rate to exceed 0.2 cubic-feet per second. The purposes of use are stockwatering (for up to 100 head of cattle) and irrigation of 81 acres of pasture and 12 acres of nursery. The place of use is thus 93 acres out of the total Broken Arrow Ranch acreage of 240 acres.	Neg	10/25/2004
2004092110	Sacramento River Mile 154.5R Bank Protection Maintenance for 2004 Water Resources, Department of Colusa--Colusa The project will place fill material into four eroded scours totaling 160 linear feet in the Sacramento River channel for flood project maintenance, in order to restore pre-existing bank contours and stabilize the site against further erosion during flooding events. Only bank located above the ordinary high water mark will be restored, so there will be no in-water work for this maintenance project. Although the work will occur directly adjacent to mature blue elderberry bushes which are habitat for the Federally-listed valley elderberry longhorn beetle, the bushes will be completely avoided and not adversely impacted. All areas where grading or fill activities scarify the soil will be stabilized with standard erosion control practices, including revegetation. There will be no significant environmental impacts associated with this project due to the incorporation of mitigation measures.	Neg	10/25/2004
2004092111	Antelope Place Community Plan Amendment, Rezone, Development Plan Review, Special Development Permit and Review of Parking Sacramento County --Sacramento The proposed project is to rezone an existing ~5 acre property from RD-20 and BP to LC and construct a mixed-use apartment complex and retail center. Retail would occupy some first floor areas while apartments would have both first and second floor areas. A detention basin would be constructed where there is an existing drainage ditch bisecting the property. The project will also require the removal of	Neg	10/25/2004

1994051010	<p>Rancho Sann Vicente, SP92-002, LOG NO. 92-14-14 San Diego County RAMONA--SAN DIEGO</p> <p>This is a request to amend the Rancho San Vicente Specific Plan to eliminate the requirement to dedicate open space easements over certain residential lots located generally along the riparian corridor that forms the border between the development area and the large open space parcel in the westerly portion of the project site. Other open space easements in the vicinity of the riparian corridor that were intended to protect oak trees and other natural vegetation are also proposed to be vacated. The clearing required to comply with the Wildland/Urban Interface Ordinance would impact the vegetation and reduce its value both as habitat and as a significant natural feature needing to be retained as part of the community design program. The open space easement will be replaced with a Limited Building Zone Easement for the first 100 feet from the Open Space Preserve Boundary.</p>	NOD	
2001071015	<p>The Headlands Development and Conservation Plan (HDCP) Dana Point, City of Dana Point--Orange</p> <p>Revisions to the Headlands Development and Conservation Plan (HDCP) approved by the City of Dana Point in January 2002, a mixed use development project, including the following land uses: residential, visitor/recreation commercial, recreation open space, and conservation open space. The California Coastal Commission subsequently certified LCP Amendment 1-03 to the Dana Point LCP for the project, provided that 199 suggested modifications be incorporated and adopted by the City of Dana Point. These changes are the subject of the EIR Addendum and were approved by the City of Dana Point and incorporated into the project.</p>	NOD	
2001112014	<p>Long Marine Laboratory Coastal Long Range Development Plan University of California, Santa Cruz Santa Cruz--Santa Cruz</p> <p>The project is approval and implementation of the University of California, Santa Cruz "Coastal Long Range Development Plan" (CLRDP), a comprehensive physical development and land use plan that governs development, land use, and resource protection at the approximately 98-acre UC Santa Cruz Marine Science Campus, including the UC Natural Reserve System, Younger Lagoon Reserve (YLR).</p> <p>The CLRDP building program proposes construction of new facilities within three development areas and the removal of several trailers and other temporary facilities. Under the CLRDP, 561,100 SF of new development would be constructed on the Marine Science Campus; this includes approximately 409,100 SF of new building SF and 152,000 SF of new outdoor uses.</p> <p>The largest part of the building program is devoted to marine research and education at 254,500 SF. Other development components include:</p> <ul style="list-style-type: none"> - 19,000 SF of support facilities - 98,100 SF of support housing - 37,500 SF equipment storage and maintenance facilities - 152,000 SF of outdoor research area, lay-down yard, and expanded seawater system capacity - Miscellaneous uses, including public access and recreation facilities and parking facilities. 	for Sierra Nevada Memorial Hospital.		
2003122011	New West Sacramento High School/Community Park Project Washington Unified School District West Sacramento--Yolo The proposed project consists of a combined high school and joint-use community park on approximately 100 acres of land. Facilities to be constructed include a comprehensive high school of approximately 300,000 square feet serving a planned maximum capacity of 3,000 students in grades 9 through 12, and construction of associated parking, athletic fields, hardcourts, and landscaping.	NOD	
2003122097	McHenry Library Project University of California, Santa Cruz --Santa Cruz Project will renovate the existing 161,700 GSF McHenry Library and construct a new 116,550 GSF addition to the existing library. The 1.5-acre building site is in the center of the UCSC campus, north of the Arts and Academic Resources Center, southeast of Kerr Hall and "Science Hill," and southwest of Hahn Student Services. The project also includes: improvements to the existing service road along the west side of the library; reconfiguration of parking lots; landscaping; pedestrian pathways, an outdoor entry plaza; site lighting and improved disabled site access; relocation of the library loading / service dock and associated parking; development of a new bicycle path and provision of bicycle parking facilities; installation of a Stormwater management system; and installation of utility connections. A new 65,000 gallon, 20-foot tall water storage/tank system will be added to the existing chiller plant of the Earth & Marine Sciences (EMS) building located near the EMS building. It will chill water for the addition and renovated library during low energy demand periods (evening) and have chilled water available for the completed project at peak demand periods during the day. Area of disturbance includes 2.85-acres.	NOD	
2004011057	Education and Social Sciences Building University of California, Santa Barbara Goleta, Santa Barbara--Santa Barbara The Education and Social Sciences Building project contains a total area of 205,850 gross GSF in three buildings. The Gevirtz Graduate School of Education is proposed to be house in one building of approximately 93,400 GSF. Selected departments of Letter and Science including Sociology, Law and Society, and Communication and Film Studies are proposed to be housed in a second building totaling approximately 96,950 GSF. The new Center for Film, TV and New Media is proposed to primarily be housed in the third building of approximately 15,500 GSF that includes a film theater, production suite and support spaces.	NOD	
2004041036	Creekside Trails San Diego, City of --San Diego Site Development Permit to reduce the required parking and setbacks for 50 affordable (to very low income) housing rental apartment units (43,980 SF of space), 75 above-ground parking spaces, and 1,275 feet common space on a 121,097 SF site at 2170 Coronado Avenue in the RM-1-1 Zone within the Otay Mesa-Nestor Community Plan, Coastal Height Limit, Council District 8. The proposed residential buildings would comply with the 30 foot height limit and would be constructed at grade. The buildings would occupy a total footprint of 20,853 SF and parking and drives occupying a total of 25,348 SF for a total of 46,201 SF	NOD

2004098380	Ford Park Sports Complex Bell Gardens, City of Bell Gardens--Los Angeles Approval of a project involving the renovation of John Anson Ford Park including: restroom and concession building, ball fields, soccer fields, sports field lighting, general park and pedestrian lighting, hardscape, landscape, site furnishings, permanent fencing, general site work, demolition, temporary fencing, grading and storm drain, synthetic turf soccer fields, portable service building and fencing, contingency, new service yard, and primary service yard access.	NOE	
2004098381	Ulatris Flood Control Project:Emergency Hawkins Road Bridge Scour Remediation Solano County Water Agency --Solano During a recent bridge inspection, Caltrans noticed that a County bridge, Brynes Road Bridge (No. 23C-166), is severely impacted by scouring of the flood control channel. The County maintains the actual bridge structure, while the Solano County Water Agency is responsible for maintenance of the channel. According to Caltrans, the elevation of the channel flowline near the bridge is actually lower than the elevation of the top of the spread footings of the bridge. Therefore, a minimal amount of additional scour could undermine the bridge footing, endangering the structural integrity of the bridges. SCWA will install a series of boulder weir to inhibit further channel degradation and promote re-establishment of the as-built channel grade by natural recruitment of bed material. SCWA will also backfill the scoured areas immediately surrounding the structures with well-graded rock and cobble ("river run") to provide immediate protection of the exposed footings. The design will specify boulder weir structures that provide for grade control and direct downstream flows towards the central channel thalweg. The weirs will be constructed in such manner as to remain	NOE

The proposed revisions will address HCD's concerns to receive that certification so the County can be more competitive in applications for State and federal grant programs.	EIR	
2002021130	Pebble Beach Company's Del Monte Forest Preservation and Development Plan Monterey County --Monterey This partially revised and recirculated document has been prepared to add significant new information to the EIR which has become necessitated in response to comments from the public to the February 2004 Draft EIR and due to the availability of new information. The project consists of a Combined Development Permit that will result in new development at 13 locations. The project includes four primary elements: 1) new visitor-serving, recreational and residential development; 2) dedication of conservation easements for the preservation and conservation of certain areas; 3) road, infrastructure, and trail improvements; and 4) resource management of preservation, conservation, and managed habitat areas within and adjacent to proposed development. In summary, the proposed project will result in the construction of a new 18-hole golf course, a new driving range at the Spanish Bay Resort, and 160 new visitor-serving suites; relocation of the existing Equestrian center; creation of 33 residential lots within 5 subdivisions; construction of 60 employee housing units; and the preservation of 492 acres.	EIR	11/10/2004
2003122003	San Quentin State Prison Condemned Inmate Complex Corrections, Department of Larkspur--Marin The California Department of Corrections proposes to construct a new condemned male inmate complex (CIC) on an approximate 40-acre site within the existing boundaries of San Quentin State Prison, which would provide 1,024 cells that could safely house 1,408 condemned male inmates. The CIC would be separated from the main prison by an outer patrol road, security fencing, and an inner patrol road. Elements of the project include high-mast lighting, program service buildings (i.e. correctional treatment center, housing units) and a kitchen.	EIR	11/10/2004
2004061133	The Tehachapi East Afterbay Project Water Resources, Department of --Kern Construct a new afterbay facility (reservoir) northeast of Cottonwood Chutes near the East Branch of the California Aqueduct to provide additional storage to the existing Tehachapi Afterbay.	EIR	11/10/2004
2004072042	Eureka Redevelopment EIR Eureka, City of Eureka--Humboldt To better facilitate the elimination of blight by allowing greater flexibility in the expenditure of tax increment revenues among the three redevelopment areas, the City of Eureka is proposing to financially merge three existing redevelopment areas. Near-term projects that would occur under the merger of the three existing	EIR	11/10/2004

NOD	
2004021007	Reclaimed Water Storage Facilities Modifications Eastern Municipal Water District Moreno Valley, San Jacinto--Riverside The Moreno Valley Regional Water Reclamation Facility (RWRF) presently has 18 reclaimed water storage ponds. Eastern Municipal Water District (EMWD) intends to deepen four of these ponds by about 13 feet. These four ponds have a total surface area of 524,000 SF. Deepening these four ponds by 13 feet would increase the storage capacity by about 156 acre-feet. The Sun City RWRF has eight reclaimed water storage ponds. EMWD intends to deepen four of these ponds by about 10 feet. These four ponds have a total surface area of 523,000 SF. Deepening these ponds by 10 feet would increase the storage capacity by about 120 acre-feet. It is also proposed to construct a new storage facility at the Sun City RWRF. The new pond would have a total surface area of 400,000 SF. Constructing this pond to a depth of 15 feet would add an additional storage capacity of about 136 acre-feet.	NOD	
2004032085	Hastings Tract Fish Screen and Intake Pipe Relocation Project Reclamation District 2060 Rio Vista--Solano Hastings Island Land Company proposes relocating irrigation activity from Cache Slough to Lindsey Slough and outfitting new intake pipes with a passive fish screen system and a conventional cleaning system. Changing the point of diversion would reduce the entrainment losses of delta smelt and other priority fish species in Cache Slough and improve agricultural water quality.	NOD

2004098403	Grading Permit for 10842 Gay Road in Wilton Environmental Review and Assessment, Department of --Sacramento The project applicant graded approximately 13 acres of parcel 134-0173-013-0000 and parcel 134-0173-014-0000. The southern parcel (#134-0173-013-0000) had been leveled and a 4-foot tall dirt berm was constructed around the perimeter of a 2.4-acre rectangular area on the northern parcel (134-0173-014-0000). The berm was the only structure observed on the site. The project site is zoned A-5, which is an interim agricultural zone with a minimum lot size of five acres. This zone is similar in purpose and allowable uses to the Agricultural/Residential zone. The 1993 Sacramento General Plan designates the area as Agricultural/Residential. The project applicant is in the process of constructing a sturgeon (fish) rearing facility, which the Sacramento County Planning Department determined to be consistent with zoning and land use. No trees, listed species, waterways, or severe geologic hazards were observed on the site.	NOE

2004098417	Sabrina Dam Repair Fish & Game #7 Bishop--Inyo Drain Sabrina reservoir; construct temporary diversion; remove existing grizzlies; attach new intake/grizzly structures to existing concrete footing, making repairs as necessary; install trashracks; remove existing riprap diversion wall, dig footings, install steel reinforcement, and construct concrete form; pour footings and wall; remove all leftover construction materials and debris; return lake level.	NOE	
2004098418	Wolf Creek Bridge Replacement Fish & Game #3 --Lake The project involves the repair of an existing bridge on Wolf Creek, tributary to North Fork Cache Creek, tributary to the Sacramento River in Lake County (Section 13, Township 14N; Range 07W). An existing main artery bridge located on Wolf Creek Road has been closed to all traffic due to unsafe structural conditions on the roadway. Access is currently by way of a low water crossing that will be dismantled prior to any flows into Wolf Creek. The Department of Fish and Game is executing a Streambed Alteration Agreement Number 1600-2004-0632-3 pursuant to Fish and Game Code Section 1602.	NOE	
2004098419	Plant Road Channel Maintenance Fish & Game #3 Ukiah--Mendocino The proposed project involves excavation of accumulated gravel material from a box culvert on Plant Drive in Ukiah, California. The project is located on Spanish Canyon Creek a tributary to the Russian River (Section 33, Township 15N; Range 14W of the Ukiah 7.5 minute U.S. Geological Survey quadrangle). Excavation is required to maintain the flow capacity of the crossing and prevent flooding during high flow events. The Department of Fish and Game is issuing a Streambed Alteration Agreement Number 1600-2004-0378-3 pursuant to Fish and Game Code Section 1602.	NOE	
2004098420	Lilac Lane Stream Crossing Fish & Game #3 St. Helena--Napa The operator proposes to replace an existing crossing over Canyon Creek at 104 Lilac Lane in St. Helena, Napa County. The existing culvert is a 48-inch corrugated metal pipe that has rusted out leaving on the concrete. The capacity of the culvert is not sufficient to handle the flows in the creek which causes the water to go over the road and erode the banks. This erosion has caused a dangerously narrow crossing. The new crossing will be two 4 foot high by 5 foot wide by 8 foot long box culverts connected by a masonry joint to create a 16 foot wide culvert. Three footings will be poured in the streambed to anchor the ends and the joint section of the culvert. The capacity will go from 12.56 square feet to 20 square feet. Issuance of a Streambed Alteration Agreement Number 1600-2004-0419-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2004098421	Scotts Creek Bank Restoration Fish & Game #3 Lakeport--Lake The proposed project involves the repair of a failed bank on Scott's Creek at Scott's Creek Road (MP 0.75) in Lake County (Section 22, Township 14N; Range 10W of the Lakeport 7.5 minute U.S. Geological Survey quadrangle). Approximately 200	NOE

	feet of the existing bank has failed and threatens to undermine Scott's Creek Road. The Department of Fish and Game is issuing a Streambed Alteration Agreement Number 1600-2004-0654-3 pursuant to Fish and Game Code Section 1602.		
2004098422	Loasa Bridge Replacement Fish & Game #3 --Lake The proposed project involves the replacement of an existing 6-foot by 10-foot timber bridge with a 71-inch by 47-inch corrugated steel pipe arch culvert on an unnamed tributary to Cole Creek. The project is located on Loasa Road, 470 feet west of Gaddy Lane, Kelseyville in Lake County (Section 02, Township 13N, Ranch 09W of the Kelseyville 7.5 minute U.S. Geological Survey quadrangle). The Department of Fish and Game is issuing a Lake and Streambed Alteration Agreement Number 1600-2004-0655-3 pursuant to Fish and Game Code Section 1602.	NOE	
2004098423	Cameron Via Roble Fish & Game #3 Lafayette--Contra Costa The operator proposes to fill approximately 290 linear feet of ephemeral drainage which has a maximum width of 1.5 feet in order to construct a sediment basin, driveway, and lot pad on a 16.5 acre site located north of Highway 24 and west of Via Roble in the City of Lafayette, Contra Costa County. Runoff from the drainage will be collected into a 12-inch to 15-inch storm drain pipe. A "T" energy dissipater will be placed on the end of the pipe and the water will outfall onto a bed of loose rock rip rap in the drainage at the downstream end of the pipe. Issuance of a Streambed Alteration Agreement Number 1600-2004-5256-3 pursuant to Fish and Game Code Section 1602.	NOE

	<p>switchyard;</p> <ul style="list-style-type: none"> - Construction of a third Brushy Creek pipeline and surge tank parallel to existing dual pipeline (Stage 1 and Stage 2) system. DWR refers to this third pipeline as "Stage 3"; - Construction of a 500 acre-foot (AF) reservoir (425 of active storage plus 75 AF inactive storage) served by the Stage 3 Brushy Creek Pipeline; - Raising the height of canal embankments, canal lining and canal overcrossing structures and bridges for the Dyer, Livermore, and Alameda Canals, including Patterson Reservoir; - Modification of check structures and siphons along the Dyer, Livermore, and Alameda Canals; and - Construction of new drainage over crossing structures to eliminate drainage into canals. 		
2004051098	<p>Outdoor Education Camp Orange County Orange--Orange</p> <p>The proposed project site consists of 210 acres, of which 57.15 acres will be devoted to the camp facilities and the remaining 152.85 acres will remain as open space. The OEC will be primarily dedicated to providing opportunities for scouts and other youth-organizations, to experience outdoor education and recreation programs. It is secondarily dedicated to providing training to adult leaders of such programs and activities. The applicant, Boy Scouts of America, will build, operate, and manage the camp.</p>	EIR	11/12/2004
2004091159	<p>Tijuana River Valley Regional Park Trails and Habitat Enhancement Project San Diego County San Diego--San Diego</p> <p>The County of San Diego is proposing to implement a Trails and Habitat Enhancement Project (Proposed Project) in the Tijuana River Valley Regional Park. The proposed project is intended to refine and permit a network of multi-use recreational trails, which will facilitate recreational access and allow for the rehabilitation of degraded natural habitats within the Tijuana River Valley Regional Park. The proposed project includes the following specific components:</p> <ul style="list-style-type: none"> -Creation of a formally designated multi-use recreational trail network; -Habitat creation and restoration of approximately 60-acres including wetland, riparian and upland habitats; -Installation of a steel-truss recreational bridge crossing over the Tijuana River; -Interceptive/directional signage and benches at key areas; -Bird observation blinds and trail fencing; -Eastern trailhead staging area consisting of 2-acres along Dairy Mart Road; and, -Creation of a park management plan to guide the long-term development and management of uses and resources within the Tijuana River Valley Regional Park. <p>Currently, there is no formal or permitted recreational trail network within the Tijuana River Valley Regional Park (TRVRP) recognized by the County of San Diego. The proposed project would utilize selected portions of existing dirt roads and pathways and includes realignments, enhancements and closures where haphazard and unplanned development of trails has resulted in habitat degradation, deterioration of the quality of natural resources, and declining recreational user experience in the TRVRP. Minimal new trails and trail linkages would be developed as part of the proposed project.</p>	NOP

2004098468	Box Springs Feeder Assessment Metropolitan Water District of Southern California Riverside--Riverside Metropolitan has performed electromagnetic inspections of the Box Springs Feeder, a 96-inch diameter prestressed concrete cylinder pipe (PCCP), originally installed in 1975. The electromagnetic inspections have revealed anomalous readings at 14 locations. The extent of damage, if any, at these locations could not be interpreted by the electromagnetic inspections due to the presence of internal steel bands within the pipeline. Metropolitan has authorized a study to determine the condition of the anomalous sections. Metropolitan will excavate pipe sections at three locations to determine if radial cracks are present in the exterior of the pipe, and remove the steel bands for inspection.	NOE
